“Quality Improvement in the Care of Chronic Disease in Family Practice: the contribution of education and research”.

Dear colleagues - researchers and doctors,

On behalf of the organizing committee, we would like to invite you to the 74th EGPRN meeting, which will be held in Ljubljana.

The theme of the meeting is Quality improvement in the care of chronic disease in family practice: the contribution of education and research. Our profession is under constant internal and external revision. We are facing many challenges in the development of structured clinical approach, organization of the practices and role of team members. Measuring practice performance and competence is provided in most countries. Development of quality control and constant aiming for improvement of our work have provoked a vast amount of research aimed to develop methods, tools and outcomes of quality in structured care for patients with chronic disease. Many positive, but also discouraging results of the structured care have been reported. On the other hand, patients' personal preferences can differ from the aims of quality care that we are pursuing. Patient centeredness and shared decisions need to be balanced with the quality indicators and paradigm of quality improvement.

The meeting will be enriched with the contribution of the EURACT which will present the programs on teaching and learning about quality improvement in the practice population. As many of you are not only researchers but also teachers we believe that you will be interested in the Euract workshop which will be divided in two parts to cover the topic more into depth.

We encourage you to actively participate in the meeting by sending abstracts of your research, and by joining the discussion of the presentations.

The EGPRN meeting is also a place of friendly contacts and informal discussions on various matters, a place where future collaboration can be started or a place to enjoy company of each-other.

We are looking forward to host you in our beautiful city with the architectural jewels of architect Plecnik, vivid Saturday market and lively streets in sunny May. You can climb the hill to Ljubljana castle, have an ice cream in Preseren market, walk on the embankment of Ljubljanica river or stroll through the old baroque centre of the city.

Come, learn, socialize and enjoy in Ljubljana.

Marija Petek Ster,
National Representative of EGPRN in Slovenia.

Davorina Petek,
On behalf of the Host Organizing Committee.

CALL FOR PAPERS

CONFERENCE WORKSHOPS

Thursday 10 May 2012

1: EGPRN Conference Workshop on “Vocational Education and Training in Quality Improvement”.

(Part ONE: Morning 10.00 – 12.30 hrs.)

(Part TWO: Afternoon 14.00 – 16.30 hrs.)

1. Morning: EGPRN workshop: Vocational education and training in quality improvement – part 1 (10.00-12.30)
2. Afternoon: EGPRN workshop: Vocational education and training in quality improvement – part 2 (13.30-15.30)

General learning objectives:

1. To know and understand theory about measuring and improving quality in health care
2. To be aware of the our profession is under internal and external supervision

Brief description of the training:

Workshop has two parts: morning and afternoon. Each of the part lasted for two and a half hours. The workshop will be prepared in collaboration with EURACT and EQuip.

Morning part:

On the beginning of the WS we will present survey on existing training programmes and empathies the part in which teaching is focusing on quality improvement. The inclusion of individual quality improvement topics in continuous medical education is different for different topics: measuring practice performance and competence is included in most countries and learning to work with practice population is included in least countries. In a buzz groups and in a plenary discussion we will try to convince the audience, that teaching quality is an important topic of teaching at all levels of teaching.

Teaching and assessment methods and skills in adult learning, their strength and limitations will be presented. Before we start with leaning we need to define educational needs of the learner. The main goal of personal learning plan as a tool for assessing educational needs is to form systematic approach to our own education and improve the quality of our work. The process of preparing and evaluating of personal learning plan will be presented. During the small group work participants will develop their own personal learning plan and they will get feedback from the faculty.

Afternoon part:

The second part of the workshop will be focused on assessment of OI learning. The goal is to have residents competent to investigate and evaluate their own patient care practices, integrate scientific evidence and be able to improve their practices. QI learning will start with self assessment and continuing with practice-based learning and improvement (PBLI).

We discuss about assessment tools. Available assessment tools do not adequately address all of the components of PBLI and in a small group work we will try to design assessment toll for quality improvement, focusing on assessment of teaching in QI.

In the last part of our workshop we will present the research agenda for quality improvement projects and the influence of research projects on improvement quality of education. We will discuss about the possible research projects on the field of teaching and assessment quality and potential collaboration between different networks interested in researching, teaching and assessment QI in a field of family medicine (EURACT; EQuip and EGPRN)

SOCIAL PROGRAMME

- * **Thursday 10th May: 18.30 h.: For ALL EGPRN-participants** of this meeting who are present in Ljubljana at this time (Entrance Free).
Welcome Reception and Opening Cocktail
- * **Friday 11th May: 18.00 h.: Practice Visits to local Health Centres in Ljubljana.**
- * **Saturday 12th May: 19.45 h.: Social Night – Gala Dinner, speeches and party**
Entrance Fee €40,=.

SUBSIDISED PARTICIPATION

The EGPRN is able to provide some financial support for EGPRN-members who have difficulty in raising the money for travel and stay to attend the Meeting and present a paper or poster. Please write to the EGPRN Co-ordination Centre for more information when submitting your abstract and explain your personal situation.

WEATHER CONDITIONS

Average high temperature in Ljubljana-Slovenia in May around 15-20 C and warmer in the sun.

Average low temperature at night 7-10 C.

THE EGPRN SCIENTIFIC PROGRAMME

EGPRN welcomes the presentation of research relevant to general practice/family medicine. The Workshop welcomes research ideas, research in progress and completed research and aims to provide ample time for discussion of each presentation. There are four formats for presentation as detailed below.

THEME PAPERS

At each meeting, time is allocated to papers on a specific theme. The theme is suggested by the country hosting the meeting and approved by the EGPRN Council. The current theme is “Quality Improvement in the Care of Chronic Disease in Family Practice: the contribution of education and research”. Theme papers are allocated 30 minutes each, of which 15 minutes is for the presentation and 15 minutes for discussion.

FREE-STANDING PAPERS

These are presentations not related to the theme. They are allocated 30 minutes each, of which 15 minutes is for the presentation and 15 minutes for discussion.

ONE SLIDE-FIVE MINUTES PRESENTATION

One slide-five minutes presentations are for researchers who want to suggest an IDEA for research, raise a QUESTION concerning a research problem or want to invite others to participate in a planned study. This section is NOT for preliminary results. Five minutes is allocated for the presentation, using only one slide! Then there is five minutes for discussion.

SESSION FOR ‘RESEARCH IN PROGRESS’

This session is specifically defined for research dedicated to presentations without results - ‘research in progress’. If necessary EGPRN could offer mentorship.

Tick the box ‘research in progress’ while submitting your abstract if you want to obtain for this session.

POSTERS

Posters are displayed throughout the whole conference. One session is allocated for discussion of the posters by the Workshop. The poster presenter is encouraged to attend the whole conference, but is required to be present for the poster discussion session. Postersize 1.75(h) x 1.00(w) m.

Authors: Please add a photograph and e-mail address to your poster.

At the end of the conference the best poster will be awarded with a prize (€50, a nice certificate and a lot of honour!).

COLLABORATIVE RESEARCH DEVELOPMENT MEETING

During the meeting there is an opportunity for researchers to exchange information on research funding opportunities and to identify potential research collaborators. This is a 30 minute meeting with informal contributions. If you wish to contribute to this meeting please contact the chairperson of the EGPRN Research Strategy Committee, or send an e-mail to hanny.prick@hag.unimaas.nl prior to the meeting.

RESEARCH FUNDING OPPORTUNITIES

Researchers who have presented at an EGPRN-meeting are eligible to apply for research funding to enable them to develop their research. For details of the aims, process and funding available, please contact the EGPRN Executive Manager at office e-mail:

hanny.prick@hag.unimaas.nl or see the EGPRN website: <http://www.egprn.org>

FEEDBACK WHEN AN ABSTRACT IS REJECTED

There is a tick box on the application form to get feedback from the scoring committee when a submitted abstract is rejected for presentation. Please tick this option if you wish to receive this information.

FEEDBACK ON PRESENTATION SKILLS

Those presenting a paper are offered the opportunity to receive feedback on their presentation skills. The feedback will be given by one of the other participants, on a one-to-one basis. A semi-structured checklist will be used that covers the following aspects: structure, clarity, intonation, speed, volume, non-verbal communication, and use of audiovisuals. If you wish to receive feedback on your presentation skills please tick the box on the application form.

CRITICAL DATES

* **ABSTRACTS** should be submitted at www.egprn.org

before January 15th 2012 !!!!!

- * Notice of acceptance/rejection by March 2012
- * Definite programme: by April 2012
- * Meeting: 10th – 13th May 2012

APPLICATION:

use the electronic application facility <http://ljubljana.egprnapplicationforms.nl/>
at the EGPRN website www.egprn.org

You can apply:

- * to present a paper (include abstract-form)
- * to present a poster (include abstract-form)
- * to present a one-slide/five minutes presentation (include abstract-form and your slide)
- * to participate without presentation (form to EGPRN)
- * to participate in a pre-conference workshop

OUR NEXT MEETING:

- ▶ The autumn meeting of October 2012 will be in Antwerp-Belgium
The decided theme is: “Research on patient-centred interprofessional collaboration in primary care”.
Deadline for sending in abstracts will be 15th June, 2012

INSTRUCTIONS FOR SUBMISSION OF ABSTRACTS FOR THEME PAPERS, FREE-STANDING PAPERS, POSTERS AND ONE-SLIDE FIVE MINUTES PRESENTATIONS

ABSTRACT

- **Use the following headings:**
 - Background, Research question(s), Methods, Results, Conclusion(s)
- **Describe:**
 - *Background:* what is the problem domain your study is relevant for? (what is already known, what knowledge is needed, and what new knowledge will be provided by your study) [suggestion: \pm 50 words]
 - *Research question(s):* write down the exact question(s) your study will give the answer to (if >3 objectives you will score less points on this criterion; we prefer focused research) [suggestion: \pm 20 words]
 - *Methods:* mention at least study design, setting, participant selection, main variables measured (incl. reference standard in case of a diagnostic study or primary outcome measure in case of a cohort study or RCT) or qualitative methodology, analysis methods (quantitative, qualitative) and statistics (when appropriate) [suggestion: \pm 100 words]
 - *Results:* present main results, on which the answer(s) to your research question(s) is/are based; confidence intervals are preferred above p-values. In case of a research proposal or ongoing study, describe expected or preliminary results [suggestion: \pm 100 words]
 - *Conclusion(s):* expressed as answer(s) to your research question(s) and based on your results [suggestion: \pm 30 words]
 - In case of a *one-slide/five minutes presentation* we expect that you clearly describe background, (idea for) research question and proposed methodology
- **Max. 300 words**, provide a word count

POINTS FOR DISCUSSION

- Write down 1-3 points you would like to discuss with your audience at the EGPRN meeting.
- These points will not influence the abstract selection process
- When your abstract is selected for presentation, these points will be added to the abstract book

ABSTRACT SELECTION PROCESS

Four independent scorers will assess your abstract, according to the following 8 criteria:

- *Validity of the (proposed) study:*
 1. Is/Are the 'research question(s)' stated clearly? Max. 3? Clear focus?
 2. Is the applied methodology incl. design and setting appropriate to answer the research question(s)?
 3. Are the results consistent with the research question(s) and applied methodology?
 4. Are conclusion(s) based on results?
- *Relevance of the (proposed) study:*
 5. Does the (proposed) study add new knowledge to our knowledge base?
 6. Does the (proposed) study address a clinical topic?
 7. Are the (expected) results applicable in GP/FM/PC (practice, education, organisation)?
 8. Are there any special merits (e.g. original methodology, difficult research circumstances, junior researcher etc.)?

A maximum of 50 abstracts of apparent good quality will be accepted (max. 20 posters, max. 30 oral presentations). Research proposals as well research ideas (one-slide/five minutes) will be judged according to criteria 1, 2 and 5-8.

EXAMPLE OF AN ABSTRACT

Background: In the western world peripheral arterial disease (PAD) is a major threat to the health of the elderly. Despite results of previous studies showing that the Ankle-Brachial Pressure Index (ABPI) is a meaningful indicator of the prognosis of patients with PAD, only 20-40% of the general practitioners centres in the Netherlands use the ABPI measurement.

Research question: Can ABPI measurements help in assessing the prognosis of subjects with and without PAD?

Method: The data set of the Limburg Peripheral Arterial Occlusive Disease Longitudinal Study (18 general practice centres, n=3649, mean age 59 years, mean follow-up time 7.2 years) was analysed for this purpose. Baseline and follow-up measurements included a self-administered questionnaire on signs and symptoms and a vascular physical examination. The ABPI was measured independently, using a handheld Doppler device. Outcome measures were progressive limb ischaemia, cardiovascular morbidity and (cardiovascular) mortality. Cox proportional hazard models were used to investigate the associations between ABPI categories and clinical outcome.

Results: Subjects with an ABPI between 0.90 and 1.00 were at higher risk to develop progressive limb ischaemia when compared to those with ABPI values ≥ 1.00 . Patients with a moderately reduced ABPI ($0.70 < 0.90$) were at higher risk for the development of progressive limb ischaemia and non-fatal cardiovascular disease when compared to subjects with an ABPI ≥ 0.90 . Patients with an ABPI < 0.70 not only developed non-fatal events more often but also were at highest risk to experience a fatal event.

Conclusions: Our results demonstrate that the lower the ABPI, the worse the prognosis with regard to fatal and non-fatal (cardio) vascular events. This knowledge of the ABPI can help the GP to assess prognosis in patients with PAD.
